- Raising awareness among the population in the context of vaccination, Family Planning, for behavioral change

IV. Good practices and lessons learned

- There has to be greater commitment from these NGOs in the work done in the field, in order to have a greater demand for services in the health units.
- In terms of demand, the program has not seen major changes. From our point of view, there may be a need to change strategy or there should be greater commitment from these NGOs.

V. Challenges
